# WASHING MACHINE ARISTON

Open the water connection for the washing machine (on/off switcher above the machine). Close the connection after program has finished.

Control panel

Leds

The LEDS provide important information.
This is what they can tell you:

Cycle phase under way:
During the wash cycle, the LEDs gradually illuminate on to indicate the cycle phase under way:

Prewash

Wash

Rinse

Spin cycle

Note: during draining, the LED corresponding to the Spin cycle phase will be turned on.

Function keys

The FUNCTION KEYS also act like LEDS.
When a function is selected, the corresponding button is illuminated.
If the function selected is incompatible with the programme set, the button will flash and the function will not be enabled.
If you set a function that is incompatible with another function you selected previously, only the last one selected will be enabled.

ON-OFF/LID LOCK led:

If this LED is on, the appliance Lid is locked to prevent it from being opened accidentally; to avoid any damages, you must wait for the lamp to flash before you open the Lid.

Programme table

| Type of fabric and degree of soil	Program-mes	Wash temper-at.	Detergent		Fabric softener	Bleaching /option Bleach	Cycle length (minutes)	Description of wash cycle
			Pre-wash	Wash				
Cotton								
Extremely soiled whites (sheets, tablecloths, etc.)	1	90°C	•	•	•		152	Pre-wash, wash cycle, rinse cycles, intermediate and final spin cycles
Extremely soiled whites (sheets, tablecloths, etc.)	2	90°C		•	•	Delicate/ Traditional	144	Wash cycle, rinse cycles, intermediate and final spin cycles
Heavily soiled whites and fast colours	3	60°C		•	•	Delicate/ Traditional	159	Wash cycle, rinse cycles, intermediate and final spin cycles
Heavily soiled whites and fast colours	4	40°C		•	•	Delicate/ Traditional	93	Wash cycle, rinse cycles, intermediate and final spin cycles
Slightly soiled whites and delicate colours (shirts, jumpers, etc.)	5	30°C		•	•	Delicate/ Traditional	85	Wash cycle, rinse cycles, intermediate and final spin cycles
Synthetics								
Heavily soiled fast colours (baby linen, etc.)	6	60°C		•	•	Delicate	94	Wash cycle, rinse cycles, anti-crease or delicate spin cycle
Heavily soiled fast colours (baby linen, etc.)	7	50°C		•	•	Delicate	90	Wash cycle, rinse cycles, anti-crease or delicate spin cycle
Delicate colours (all types of slightly soiled garments)	8	40°C		•	•	Delicate	80	Wash cycle, rinse cycles, anti-crease or delicate spin cycle
Delicate colours (all types of slightly soiled garments)	9	30°C		•	•		32	Wash cycle, rinse cycles and delicate spin cycl
Delicate								
Wool	10	40°C		•	•	Delicate	60	Wash cycle, rinse cycles and delicate spin cycle
Very delicate fabrics (curtains, silk, viscose, etc.)	11	30°C		•	•		67	Wash cycle, rinse cycles, anti-crease or draining cycle
PARTIAL PROGRAMMES								
Rinse	🔲				•			Rinse cycles and spin cycle
Delicate rinse cycle	🔲				•			Rinse cycles, anti-crease or draining
Spin cycle	⊚							Draining and heavy duty spin cycle
Delicate spin cycle	⊚							Draining and delicate spin cycle
Draining	⊌							Draining

Functions

To enable a function:
1. press the button corresponding to the desired function, according to the table below;
2. the function is enabled when the corresponding button is illuminated.
Note: The rapid flashing of the button indicates that the corresponding function cannot be selected for the programme set.

Function	Effect	Comments	Enabled with programmes:
Super Wash	Allows for an impeccable wash, visibly whiter than a standard *Class A* wash.	This function is incompatible with the RAPID function.	1, 2, 3, 4, 5, 6, 7, 8
Easy iron	This option reduces the amount of creasing on fabrics, making them easier to iron.	When this function is set, programmes 6, 7, 8, 11 and Delicate rinse will end with the laundry left to soak (Anti-crease) and the Rinse cycle phase LED 🔲 will flash. - to conclude the cycle, press the START/RESET button; - to run the draining cycle alone, set the knob to the relative symbol ⊌ and press the START/RESET button.	All programmes except for 1, 2, 9, 10 and Draining.
Rapid	Cuts the duration of the wash cycle by 30%.	This function is incompatible with the SUPER WASH function.	1, 2, 3, 4, 5, 6, 7, 8 Rinses
Extra Rinse	Increases the efficiency of the rinse.	Recommended when the appliance has a full load or with large quantities of detergent.	1, 2, 3, 4, 5, 6, 7, 8, and Rinse cycles.

Detergent dispenser

1. Detergent for pre-wash (powder)
2. Detergent for the wash cycle (powder or liquid)
3. Additives (softener etc.)
4. Bleach (do not use hand wash detergent because it may form too much foam!)

Use

1. Close the drum carefully by first shutting the front door followed by the rear one. Then ensure the hooks on the front door are perfectly housed within the seat of the front door. After the hooks have clicked into position, press both doors lightly downwards to make sure they do not come loose. Finally shut the external lid.
2. Open the water connection.
3. Switch the washing machine on by pressing ON/OFF button.
4. Set the PROGRAMME knob to the program required.
5. (Set the washing temperature.)
6. (Set the spin speed.)
7. Start the program by pressing the START/RESET button.
8. When the program is finished, the ON-OFF/DOOR LOCK led will flash to indicate that the appliance door can be opened. Turn the washing machine off by pressing ON/OFF button.
9. Close the water connection.

Personalisations

- **Setting the temperature.** Turn the TEMPERATURE knob to set the wash temperature. The temperature can be lowered, or even set to a cold wash.

- **Setting the spin speed.** Turn the SPIN SPEED knob to set the spin speed for the program selected. The maximum spin speed for each program are as follows:

Program	Maximum spin speed
Cottone	1000 rpm
Synthetics	800 rpm
Wool	600 rpm
Silk	No

The spin can be lowered, or the spin cycle can be excluded by selecting symbol ⊠.
The washing machine will automatically prevent you from selecting a spin speed higher than the maximum speed for each program.
