AQUA LINE BATHTUB

1. Start button

2. Air regulator - Massage power can be adjusted by rotating the air regulator knob.

3. Plug - The plug on the bottom of the bathtub is opened and closed by rotating the regulator. There might be a separate plug in some apartments.

Other information

- Water surface must always be about 5cm above the top nozzles before starting the bathtub. This prevents water splashing on the walls or on the floor.

- Starting the motor of the bathtub is not recommended when the bathtub is empty.

- The recommended bath temperature is 35-38 degrees

- The recommended bath time is 20 - 30 minutes.

- Bubble soaps suitable for bathtubs can be used in the bathtub
